

# FIRST AID POLICY

Reference should also be made to the Administration of Medicine Policy and the current Pandemic Risk Assessment

PLEASE REFER TO ANNEX B IN RESPECT OF SPECIFIC MEASURES TO DEAL WITH COVID-19

BirchfieldSchool

## Named First Aider : Mrs Louise Bolton

- 1.1 The School will provide adequate First Aid provision for its employees, pupils **(including those in the Early Years Foundation Stage)** and visitors in accordance with this Policy. The aim of this policy is to ensure, so far as is reasonably practicable, that suitable first aid arrangements are established and communicated to staff, and to comply with all relevant legislation. This policy has been drawn up using the guidance on the DfE publication: Guidance on First Aid. It is the responsibility of the School to ensure that first aid arrangements are provided in a timely and competent manner relative to the risk of injury or ill health.
- 1.2 The safety of pupils, staff and visitors at School and during 'away trips' is paramount. The School recognises however that accidents may occur, even if risks are minimised and all staff need to be aware of what to do in such circumstances.
- 1.3 The Named First Aider will carry out a First Aid Risk Assessment which will be reviewed annually and include safe storage of medicines.
- 1.4 The school has appointed a suitably trained Named First Aider to oversee matters relating to first aid e.g ensuring First Aid kits are up to date, records are maintained.
- 1.5 The school will provide appropriate training for all first aiders and ensure that any incidents are logged and investigated, as appropriate. All teaching staff undergo regular training in CPR, Medical Emergencies and Use of a Defibrillator with a practical Heartstart session every two years, alternating with Educare Online training modules as a refresher course in between. Most recently, practical training was provided on 3<sup>rd</sup> September 2019 by Heartstart for all staff. Qualified Paediatric First Aiders are present during the course of the school day and for off-site trips and Early Years' staff are also Paediatric First Aid trained with St John's Ambulance; details are at Annex B. At least one of these staff members will be on site during term time and, in the case of the Named First Aider, until after the end of the of the school day for Reception children. In light of the coronavirus pandemic, SMT have also taken an online course in Psychological First Aid.

The School will ensure that staff receive updated training on Epilepsy, Diabetes, Asthma and Allergies in line with recommended guidance from the Local Authority as and when a child enrolls at the school with a condition or is diagnosed as having a medical condition which will require support. In such circumstances, parents are invited to bring in a Care Plan from their child's doctor and a risk assessment will be drawn up by the Named First Aider and

relevant staff made aware.

New members of staff will become familiar with the school's first aid provision as part of their induction programme and will receive suitable training. The Named First Aider will lead assemblies for pupils as needed, for example, on keeping safe in the sun and effective handwashing. Regular handwashing measures have now been built into daily practice further to the pandemic along with daily temperature checks for pupils and staff.

- 1.6 The School will provide First Aid kits equipped to HSE recommended standards at locations throughout the School. They are located adjacent to hand-washing facilities. In addition, there are two first aid trolleys, one near to the playground and the other centrally to the classroom block (former Boarders' Common Room) for easily-accessible, private and emergency provision of first aid treatment. The full list of locations of First Aid kits is posted in the staff room, school office and Medical Room. A travelling First Aid kit will be provided in all School transport leaving the school premises. First Aid kits are kept in the changing rooms to accompany sports teams on away matches.
- 1.7 The School will provide Body Fluid Disposal Kits in yellow boxes containing clean-up disposal packs with protective clothing and equipment, absorbent powder, virucidal disinfectant and yellow disposable bags.

All staff will follow basic hygiene procedures when dealing with any form of injury, particularly when bodily fluids are involved. Single use, disposable gloves must be worn when dealing with any first aid situation where contamination is likely from bodily fluids and hand-washing facilities must be available. A separate bin for the safe disposal of medical waste is provided in the Common Room and yellow disposable bags are also available.

- 1.8 In the event of an accident, injury or illness on the school premises the patient should be examined and treated by the teacher or member of duty staff. If unable to walk, the Named First Aider or other Paediatric First Aider will go to the patient.

In the case of a possible head injury to a pupil or any other more serious injury or illness, duty staff will make contact with the Named First Aider and she will attend the site urgently. If treatment is successful, then the patient can return to class. If a child is unfit to continue with lessons, then the parents will be contacted to collect and take the child home.

Staff in charge of pupils are expected to use their best endeavours at all times, particularly in emergencies, to secure the welfare of the pupils at the school in the same way that parents might be expected to act towards their own children. In general, the consequences of taking no actions are likely to be more serious than those of trying to assist in an emergency. Staff who volunteer to assist with any form of medical procedure are acting within the scope of their employment and are indemnified.

Should it be apparent that the injury or illness is beyond the scope of the School to cope with, an ambulance should be called without delay. A member

of staff stays with the casualty and delegates another member of staff to summon help.

The Medical Room is currently situated on the first floor of the main house and facilities exist to treat pupils on the ground floor in the Common Room, as and if required. The room is to be relocated to a ground floor location in the year ahead. The Medical Room includes a bed, hand basin with toilet facilities next door. Other emergency treatment areas are available by the playground and in the Common Room as a first point of treatment, if required.

- 1.9 All medical accidents are to be recorded in the Accident Book. Where a medical incident occurs that is not appropriate for the Accident Book it is, nevertheless, to be recorded on the pupil's medical records. All records are to be kept for ten years. In all cases, an 'Administration of First Aid' form is to be completed by the member of staff administering the treatment. This is then forwarded to the Named First Aider and signed off by the Assistant Head on a daily basis. If appropriate, the staff member administering the treatment, class teacher or Named First Aider will also notify parents or guardians by telephone of any pupil receiving First Aid treatment.

The School Office staff will establish from parents of children who are absent the nature of any illness and, if necessary, the Assistant Head will later make contact if further information is required. Children who have suffered from vomiting or diarrhoea should not return until 2 days following the cessation of symptoms in line with general medical guidance.

- 1.10 **Accident reporting.** Where required by the Reporting of Injuries Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR), accidents, instances of ill-health and dangerous occurrences will be reported either via the HSE website [www.hse.gov.uk/riddor](http://www.hse.gov.uk/riddor) or by telephoning the HSE directly. Contact numbers are found in the Medical Room.

- 1.11 Special consideration will be given to staff or pupils who have special health needs or disabilities. Children who have documented conditions such as asthma, epilepsy or diabetes will be asked to provide a care plan from the child's doctor and the Named First Aider will ensure that the plan is adhered to by informing key staff. A meeting will take place between the parents and the class teacher to ensure that all information is up to date and the condition fully catered for.

Personal inhalers for asthma sufferers are preferably kept by individual pupils with their own back up inhaler held in the Medical Room. Pre-Prep pupils will have their inhalers kept in their classrooms. The School now has 4 spare Reliver inhalers for emergency use only for anybody who has already been diagnosed with asthma who may have forgotten or lost theirs. They will be kept in a clear container by the Defibrillator, in the School Office, in Pre-Prep and the Medical Room.

Named Adrenaline auto-injectors for children with severe allergies are kept in their classrooms, easily visible but out of reach of children. Information on

what to do in the event of an asthma attack or anaphylaxis is displayed in the staff room, main office and in classrooms.

An Automatic External Defibrillator (AED) is located on the wall outside The Hall going towards Pre-Prep. The list of staff trained is posted by the unit, Staff Room, Assistant Head's Office and in the Medical Room and instructions are clearly set out on the machine how to use it. It is recommended not to open it unless required as it could drain the battery.

**All staff are to ensure they are familiar with the contents of this Policy.**

## **Annex A**

### **FIRST AID PACKS**

First Aid packs equipped to HSE standards are located at the following points in the School. These will be checked on a half termly basis. If they are used, it is the responsibility of the relevant member of staff to inform the Named First Aider so that the pack can be restocked appropriately.

- Main Office
- On top of the bookcase opposite the internal door to PrepCare near the Staff Cloakrooms
- Staff Room
- Reception Classroom
- Year 1 Classroom
- Year 2 Classroom
- Art Classroom
- Food Technology Classroom
- Main Kitchen
- Maintenance Department
- Medical Room
- Science Laboratory
- Forest School
- Swimming Pool Hut
- Changing Rooms for Games (three in the boys and two in the girls)
- School Car and both minibuses

Further First Aid trolleys are available in the portacabin by the playground and in the Common Room.

## **Annex B**

### **SPECIFIC MEASURES DURING THE COVID-19 PANDEMIC**

The school takes particular care in adhering to Government guidance issued to deal with the COVID-19 pandemic.

The Medical Room is allocated as an area for isolation for a child or member of staff found to be positive or suspected as being positive for COVID-19. A second isolation area is the Common Room. Both rooms will be cleaned on a regular basis and immediately after use.

The Lego Room is currently being used for lateral flow testing for staff and pupils in Years 7 and 8, in keeping with the DfE guidance in place at the time, and is also cleaned regularly with Team Leaders, Louise Bolton and Amy Jones, following hygiene procedures and social distancing measures in line with the risk assessment.

Pupils in Years 7 and 8 who are not exempt from wearing a face covering are shown how to take them off safely and how to dispose of them hygienically and special bins are available for this purpose in different areas around the school.

PPE in varying degrees is to hand for all staff who need it, if supervising an isolated child, if providing Intimate Care or dealing with a child with symptoms.

## LIST OF STAFF WITH PAEDIATRIC OR OTHER FIRST AID TRAINING

This list will be displayed by the First Aid Boxes around school
